**OBREGON TO MAKE BORDER ZONE DRY**

MEXICO CITY, April 26. — The Mexican border is going to lose that part of its population known as thirsty, if plans of the Obregon government are carried out.

A draft of a law is being prepared which will make a dry zone along the border fifty miles deep. President Obregon has taken a strong stand against booze and dope along the border and is personally advocating the "dry zone."

"I am personally interested in seeing that these degrading vices are eliminated," he stated recently to the press.

The establishment of a "dry zone" at the border was agitated at the time of President Carranza, but not much progress made.

President Obregon is of the opinion that such a zone is now necessary along the border because of the vice imported from the United States and because, as he expresses it, "the frontier cities are rapidly becoming cesspools for American vices."

The government takes the stand that the practices along the border are not only hurting the dignity of the Mexican nation, but are also teaching Mexicans vices which in time would end in ruin for the border cities.

The establishment of the "dry zone," it is believed here, would make a great difference in affairs at Tia Juana, where a race meet is conducted for 100 days each year.

Many politicians are finding themselves unwilling to accept public offices that they can't get.

**CAMP MANNERS**

The vacation season draws multitudes of people out into the free life of summer camps, and it is a pleasure to see their happiness in enjoying this respite from daily labor. Some of them, however, feel such a spirit of exuberance in escaping from the daily grind, that they pay little attention to the comfort and rights of other people.

Summer camps frequently bring a lot of people close together in tents and cabins. They can live happily in this congested way, only if all are considerate of each other. If some of these people are tired folks looking for a complete rest, it is rather tough on them to have hilarious campers come rolling in at midnight or later, arousing the whole colony with their jollifications.

A group of people living in this intimate way need to be very thoughtful of each other. A single tent of noisy and careless people can make a whole colony uncomfortable, not merely by the disturbance they create, but by failure to maintain an orderly and sanitary camp. People who can not be thoughtful of others, should do their camping in remote solitudes where they won't annoy anyone.

**ARKANSAS PICNIC**

Come as early as you can and spend the day with friends. Bring your basket well filled. Coffee will be served free to all who buy the silk souvenir badges.

Miss Margaret McNulty, having closed out her business for the summer, left for Los Angeles Monday. Miss McNulty expects to return to Torrance in the fall, when she will open a millinery establishment if a suitable location can be secured.

**BUSINESS GROWS**

Agriculturalists will welcome the news that in the opinion of Albert E. Nicholls, president of the Nicholls-Loomis Company, despite a long dry season, the recent heavy rains practically assure a normal crop of hay in Southern California and contiguous territory.

Mr. Nicholls, who is an acknowledged authority on hay and grain production, is also convinced that there will be a good alfalfa crop as well as an increased demand for alfalfa this spring.

Advice states that the regular quarterly dividend checks have just

been sent out to more than two hundred shareholders of the Nicholls-Loomis Company. Gross sales for the month of March are said to be in excess of \$200,000, which represents a gain of \$30,000 over the preceding month—a new record in the successful career of this enterprise which has been in operation for more than a quarter of a century.

THE UNIVERSAL CAR

**ANNOUNCEMENT**  
Of Interest To  
**MILLIONS of FAMILIES**

"I will build a car for the multitude"  
said Henry Ford in 1903—Read how the fulfillment of  
that prophecy is now made possible through the

*Ford Weekly Purchase Plan*

For many years it has been Henry Ford's personal ambition to make the Ford the universal family car — to put it within the reach of the millions of people who have never been privileged to enjoy the benefits of motor car ownership.

During the past fifteen years over 7,500,000 Ford cars have been placed in the hands of retail customers — more than a million and a half of them within the past twelve months—and yet there are still millions of families who are hopefully looking forward to the day when they can own a Ford.

And now the way is open.

Under the terms of this plan you can select your Ford Car, set aside a small amount each week and you will be surprised how soon you will own it. In the meantime your money will be safely deposited to your credit in one of the local banks where it will draw interest.

Think it over. Five dollars will start an account. The whole family can participate in it—father, mother, brothers and sisters each doing a little.

Why not start today? Stop in and talk it over with your local Ford dealer. He will be glad to fully explain the details of the plan and help you get started toward the ownership of a Ford car.
